

This is the progress work pdf! Yay!!! Hopefully this I took enough notes to put it here. My project wasn't very graphical? I hope that's not a problem. I kinda got a bit too into the actual programming part and I know it is an interactive drawing-esque assignment, but I couldn't help it okay. The coin flip was fun. Anyways. This is all I have.

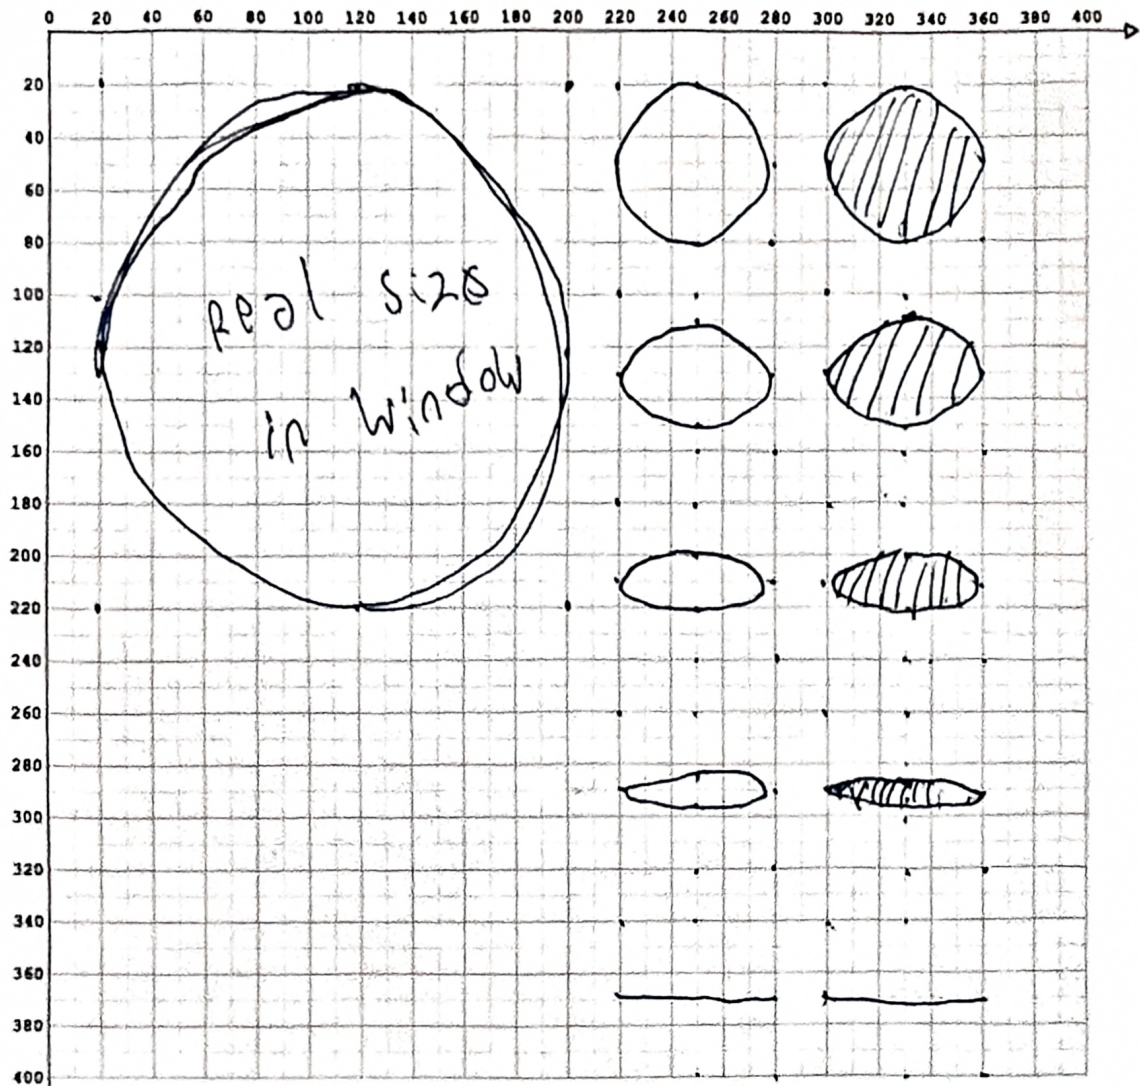

First one "O" front shrink
expand back

(x, y) 
shrink y then
expand?
how to check?

if $y \leq (0)$
↑
if $y \geq (30)$

Pixel Paper - 100 x 100
Graph Paper for Screen Coordinates

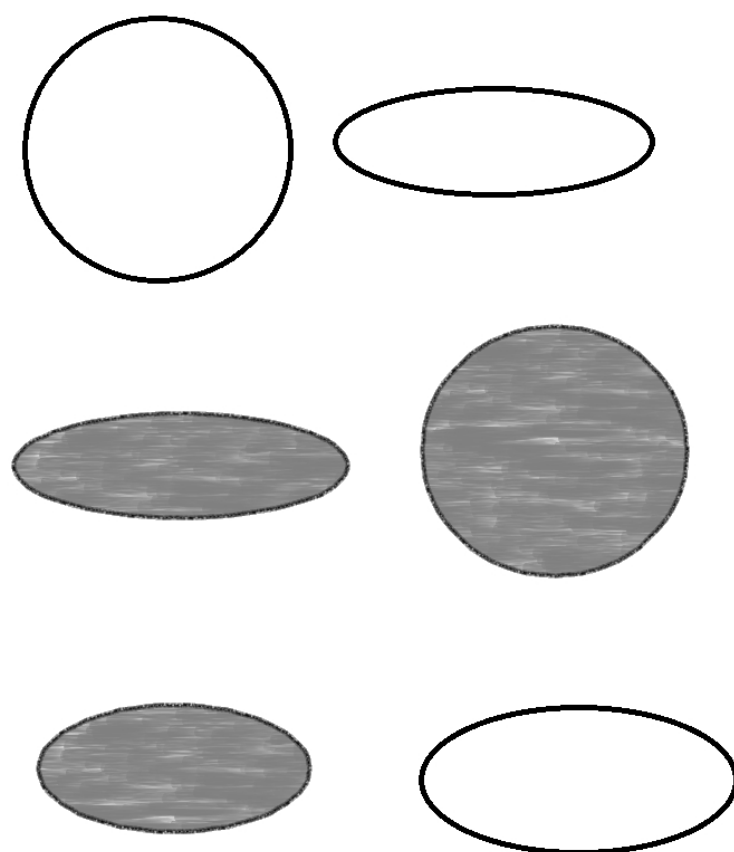

Frame 1: ○ shrink
 Frame 2: ◐ expands
 Frame 3: ◑ shrinks
 Frame 4: ◒ expands

0 1 10
 10 10 like redstone

Pixel Paper - 400 x 400
 Graph Paper for Screen Coordinates

Hopefully the scans are clear enough. I used some app on my phone to take them. Also some of these notes are kinda outdated and don't reflect exact what I did in the end, but progress! That's the interesting part.

This one is a digital drawing that I made in class to figure out why the coin flip was wrong. Hopefully it also count. I'm including it here regardless.
